

Please do not allow the Consumer Bankers Association (CBA) to weaken Indiana's Telephone Privacy law! The CBA is attempting to impose the federal "established business relationship" exemption on Indiana consumers. If successful, this would result in a major increase in annoying and unwanted telephone calls from businesses. The present law has resulted in a huge decrease in the number of annoying and unwanted telephone calls we receive. It has saved me much time and has made the home environment better. Please do not allow the gains that have been made to be reversed! Thank you for your consideration.
